SYSTEM INTEGRATION KIT FOR WALL MOUNT

OLIBOARDkSYSTEM2

The Oliboard kSystem2 enables an Oliboard interactive whiteboard, an ultrashort-throw video-projector and loudspeakers to be mounted on the wall, as an **all-in-one** system. The Oliboard kSystem2 is the ideal solution for every classroom, because it guarantees a safe, stable position for the system components and excellent standardised quality for each installation.
An optional box can be installed on the wall next to the whiteboard, to be used as a shelf and as a cupboard for a **notebook** computer connected to the whiteboard.

THE SYSTEM THAT SIMPLIFIES DAY-TO-DAY USE OF THE WHITEBOARD

INTEGRATED STRUCTURE

The Oliboard kSystem2 provides a robust fixture for the whiteboard, the projector and the speakers, keeping the number of holes to be drilled into the wall to a minimum.
It provides separate supports for the system modules, to facilitate installation, maintenance and any technological upgrades.
The video-projector is mounted with the support arm supplied by the manufacturer to maintain the original regulation and safety features.
The compartments for the speakers are fitted with brackets and designed to prevent any risk of slipping, but they can also be adjusted to house speakers of various sizes.

CONNECTION CABLES

The device cables run inside the structure so there is no danger of them being accidentally pulled out; if the optional notebook box is used, all risks from cables on the floor can also be avoided.

- **SAFETY FOR TEACHERS AND STUDENTS**

- **RAPID INSTALLATION AND MAINTENANCE**

- **READY FOR ULTRASHORT-THROW PROJECTORS (*) WITH SUPPORT ARM SUPPLIED WITH THE PROJECTOR**
