NETTUN@3000 **int'l**

TOUCH SCREEN TERMINAL

Innovative design, compact size and high performance are the main features of the latest Olivetti **cash register solution**. Nettun@ 3000int'l is not just a cash register, but rather an integrated system that responds with versatility to the needs of shops and retail catering establishments.

Nettun@ 3000int'l adopts a software application that is easy to use, due to its **touch-screen interface, fully user-customisable**, and suitable for any type of operator.

Nettun@ 3000int'l boasts excellent connectivity, with a **chip card reader** and **five USB ports**, allowing the terminal to be connected to external devices and enabling programming and diagnostics through the use of specific softwares.
